

Portable Electrical Appliance Testing

Aim

To enable delegates to acquire the skills and knowledge necessary to be able to instigate and implement a testing programme for portable electrical appliances. Practical sessions will help delegates to gain experience in testing appliances and completing the necessary documentation. The course is not restricted to qualified electricians but is suitable for anyone involved with their company's safety programme.

Course Content

- Dangers of electricity
- The law and testing of portable appliances
- Insulation and testing
- Types of appliances and their classification
- Visual inspection – test precautions
- Essential tests
- Optional tests
- Labelling
- Setting up a testing programme and keeping records

Duration: 1 day

Accreditation: Prospects Group Certificate
