

Confined Space Working (CS1)

Aim

This course is designed for delegates whose employment requires them to work in confined space and use Escape Breathing Apparatus for safety purposes. It will also enable the student, by completion of the course, to demonstrate knowledge of the Confined Space Regulations 1997, use of and relevant procedures relating to using Escape Breathing Apparatus.

Course Content

- Knowledge of the physiology of breathing
- Knowledge of breathing apparatus
- Donning and doffing procedures
- Dangers of confined spaces and relevant law
- Safe systems of work
- Emergency procedures

Duration: 1 day

Accreditation: From the Awarding Body

Please note: Due to the physical nature of the course, students complete a medical statement prior to acceptance on the course.
