

Safe Use of Power Press and Press Brakes Provision and Use of Work Equipment Regulations 1998 (PUWER)

Aim

To familiarise delegates with the requirements of the Power Press Regulations.

Target Audience

Power presses can cause serious injury or death if not correctly maintained and operated. It is necessary for all companies with power press and press brake equipment to ensure correct inspection and maintenance is carried out regularly and ensure such equipment is safe and fit for correct usage. This highly participative programme combines the legal aspects of handling Power Press and Press Brakes with practical 'hands-on' activity and will benefit all personnel who carry out or supervise these functions.

Course Content

- Safe working practices
- Regulations covering the examination and testing of power presses, including daily inspections
- Causes and prevention of accidents
- Safety devices
- Role of the tool setter
- Record keeping
- Certification of machines

Duration: 1 day

Accreditation: Prospects Group Certificate
