

A Journey towards Manufacturing Excellence

Aim

To develop employers' understanding of 'lean thinking' and some of the tools involved. Managers can develop their 'lean' strategy based on this programme.

Objectives

- Understanding the need to become 'world-class'
- Using 'lean' tools and exercises to stimulate thoughts on the need to change
- Understanding the need to implement a culture change to improve the business
- How to select the correct techniques

Course Content

The workshop is spread over two days during which theory, discussion and practical exercises can pave the way to starting the journey towards manufacturing excellence.

- World class companies
